

January 1st, 2027 AffirmedRx Choice Formulary Changes

Effective January 1, 2027

Beginning January 1, 2027, some medications covered under your pharmacy benefit will change. These updates may affect whether a medication is covered, the amount you pay, or the requirements that must be met before coverage is available.

What You Need to Know

- Some medications will move off the formulary, be added to the formulary, or no longer be covered.
- If it is a covered benefit for your plan, GLP-1 fills will be required to be monthly.
- Some medications will move to a different cost-sharing tier, which may change your out-of-pocket cost.
- Some medications will have new coverage requirements, such as prior authorization, step therapy, age limits, or quantity limits.

If Your Medication Is Listed

Do not stop or change your medication without speaking with your prescriber. Ask whether a covered alternative may be appropriate. If your prescriber believes your current medication is medically necessary, they may submit a coverage request for review. For the most current formulary and pharmacy benefit information, visit members.affirmedrx.com/7-eleven.

Medications Moving Off the Formulary

- These medications are moving off formulary. Covered alternatives may be available.
- What this means: Talk to your prescriber about a covered alternative. A coverage request may be submitted if your prescriber determines this specific medication is medically necessary for you.
