2025 AffirmedRx Choice Drug List

AffirmedRx

The AffirmedRx Choice Drug List (also known as a formulary) is a list of covered drugs. Unless specifically noted, drug list products will include all dosage forms. Your plan will generally cover these drugs if the drug is medically necessary and other plan rules are followed. This list can change throughout the year. New drugs can be added, or drugs can be removed. Drugs will be removed if the Food and Drug Administration (FDA) or the drug's manufacturer deems the drug unsafe. Drugs may also be removed when a lower-cost generic drug with the same active ingredient is added. Other changes may occur based on new clinical guidelines. You can view the most up-to-date Drug List on AffirmedRx.com.

Drugs are grouped into one of four tiers:

Tier 1

Low-cost generic drugs

Generic drugs have the same active ingredients as brand drugs and are prescribed for the same reasons. The Food and Drug Administration (FDA) requires generics to be safe and work the same as brand drugs. Generic drugs often cost much less.

Tier 2

Higher-cost generic and preferred brand drugs

Tier 3

High-cost, mostly brand drugs

These drugs may have generic or brand alternatives in Tier 1 or 2

Tier 4

Highest-cost, mostly specialty drugs

Drugs may have additional requirements or limits on coverage:

Prior authorization (PA)

Some drugs need approval before being covered by your plan. Your doctor will need to submit information for approval to make sure the drug is being used and covered correctly for your medical condition.

Step therapy (ST)

There is often more than one drug that works to treat a health condition, and costs can vary. Before a prescription is filled for a drug that costs more, you may be asked to try at least one lower-cost drug first. If you have already tried other drugs or your doctor thinks they are not right for you, your doctor can submit a request for approval.

Quantity limits (QL)

There may be a limit on how much you can get of certain drugs at one time. These limits help prevent misuse of drugs and are in place to ensure safe and effective use. If your doctor thinks the limit is not right for your situation, they can submit a request for approval of the additional amount.

Specialty

Specialty drugs are used to treat complex or rare conditions such as hemophilia, cancer, multiple sclerosis, hepatitis C and others. They often require special handling and are high cost.

(SP) To help reduce waste, each fill of these drugs is limited to a 30-day supply.

(SPP) These drugs must be filled at a designated specialty pharmacy equipped for special handling and trained to help educate patients on these medications.

Affordable Care Act (ACA)

Eligible benefit plans include \$0 coverage for these drugs in accordance with the Affordable Care Act. Please reference your benefit materials for full coverage details.

What if my drug is not on the list?

1. Check this list for covered drugs in the same drug class, or call Customer Care for help identifying alternatives.
2. You or your doctor can request a coverage exception.

Your doctor can visit paforms.com/affirmedrx/ to obtain forms for approvals and exceptions or to submit a request electronically. Submit completed forms by fax to 833-347-0611.

Requests will be reviewed and our decision communicated within 24-72 hours after the request is received from your doctor.

For more detailed information about your plan's prescription drug coverage, please review your Certificate of Coverage/Insurance or Summary Plan Description/Policy of Insurance.

If you have questions about your coverage, please call AffirmedRx Customer Care at 888-460-1579, TTY 711, 24 hours a day, 7 days a week.

This drug list represents a summary of prescription coverage. It is not all-inclusive and does not guarantee coverage. Your specific plan may not cover certain products or categories, regardless of their appearance in this document.
